REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 33-122 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 33-36 and 121, the prior art of record does not teach determining the second queue based upon the defined relationship after receiving the data in the first format from the first process; routing the data in the standard format to the second queue; receiving the data routed in the standard format at the second queue; and routing the data in the second format to the second process. As to claims 37-45 and 122, the prior art of record does not teach determining a destination address that is associated with the destination process based upon at least one of the known data type and a source address that is associated with the source process; the determining using the relationship in determining the destination address; and the relationship relating the destination address to both the known data type and the source address.

As to claims 46, 47, 63-73, 74-84, the prior art of record does not teach determining a destination address that is associated with the destination process based upon at least one of the known data type and a source address that is associated with the source process; transmitting the data in the first format with the destination address; receiving the data transmitted in the first format at the destination address; converting the data in the first format to a destination format; transmitting the data in the destination format to the destination process. As to claims 48-62 and 96-110, the prior art of record does not teach means for determining a destination address that is associated with the destination process based upon at least one of the known data type and a source address that is associated with the source process; means for transmitting the data in the first format with the destination address; means for receiving the data transmitted in the first format at the destination address.

As to claims 85-95, the prior art of record does not teach determining a destination address that is associated with said destination process based upon at least one of the known data type and a source address that is associated with the source process; wherein the determining uses the relationship in determining the destination address, and the relationship relates the destination address to the known data type without relating the destination address to the source address. As to claims 111, 112, the prior art of record does not teach, generating an acknowledgment of receipt of the data when the data is received at the destination process; notifying a user of an error

upon an occurrence of at least one of a specified number of other transmission attempts and an absence of the acknowledgment of receipt within a given time period; identifying the data type of the transmitted data after receiving the data in the source format from the source process; and determining the destination address based upon the identified data type of the transmitted data, wherein the communicated data is of a known data type.

As to claims 113-117, the prior art of record does not teach determining the destination address based upon the defined relationship after receiving the data in the source format from the source process; transmitting the data in the first format to the destination address; receiving the data transmitted in the first format at the destination address; converting the data in the first format to a destination format; and transmitting the data in the destination format to the destination process. As to claims 118-120, the prior art of record does not teach transmitting the data in the destination format to the destination process; generating an acknowledgment of receipt of the data when the data is received at the destination process; and notifying a user of an error upon an occurrence of at least one of a specified number of other transmission attempts and an absence of the acknowledgment of receipt within a given time period. Any comments
